

CANCER BURDEN

In 2004, the American Cancer Society estimates that¹

- 1,368,030 new cancer cases will be diagnosed in the United States, including 84,530 in Texas.
- 563,700 cancer deaths will occur in the United States, including 34,830 in Texas.

The average annual age-adjusted death rate for cancer per 100,000 persons²

Texas: 196.8 **National:** 199.8

LUNG CANCER

In 2004, the American Cancer Society estimates that¹

- 10,470 new cases of lung cancer will be diagnosed among men and women in Texas.
- 9,670 men and women will die of lung cancer in Texas.

The CDC National Center for Health Statistics provides the following death rates:

The average annual age-adjusted death rates for lung cancer per 100,000 persons, by race, 1997–2001^{2,3}

	Texas	National
Overall	57.6	56.2
White	58.1	56.2
Black	60.9	65.2
Hispanic	23.2	24.9
Asian/Pacific Islander	30.8	28.2
American Indian/Alaska Native	59.9	36.3

BREAST CANCER

In 2004, the American Cancer Society estimates that¹

- 12,980 new cases of breast cancer will be diagnosed among women in Texas.
- 2,410 women will die of breast cancer in Texas.

The CDC National Center for Health Statistics provides the following death rates:

The average annual age-adjusted death rates for breast cancer per 100,000 persons, by race, 1997–2001^{2,3}

	Texas	National
Overall	26.3	27.0
White	26.4	26.4
Black	32.2	35.4
Hispanic	12.8	17.2
Asian/Pacific Islander	19.4	12.6
American Indian/Alaska Native	-	13.6

COLORECTAL CANCER

In 2004, the American Cancer Society estimates that¹

- 9,220 new cases of colorectal cancer will be diagnosed among men and women in Texas.
- 3,560 men and women will die of colorectal cancer in Texas.

The CDC National Center for Health Statistics provides the following death rates:

The average annual age-adjusted death rates for colorectal cancer per 100,000 persons, by race, 1997–2001^{2,3}

	Texas	National
Overall	19.0	20.8
White	19.0	20.3
Black	22.9	28.3
Hispanic	8.8	14.2
Asian/Pacific Islander	16.3	13.0
American Indian/Alaska Native	19.1	13.9

PROSTATE CANCER

In 2004, the American Cancer Society estimates that¹

- 13,540 new cases of prostate cancer will be diagnosed among men in Texas.
- 1,760 men will die of prostate cancer in Texas.

The CDC National Center for Health Statistics provides the following death rates:

The average annual age-adjusted death rates for prostate cancer per 100,000 men, by race, 1997–2001^{2,3}

	Texas	National
Overall	32.4	31.5
White	32.5	28.8
Black	56.7	70.4
Hispanic	18.4	23.6
Asian/Pacific Islander	-	13.0
American Indian/Alaska Native	-	20.2

¹ Source: American Cancer Society Facts and Figures, 2004. Estimates exclude more than a million cases of basal and squamous cell skin cancers and *in situ* cancers, except urinary bladder, that will be diagnosed in 2004. Lung cancer rates include bronchus cancer. State death totals were rounded to nearest 10.

² Source: Centers for Disease Control and Prevention (CDC) National Center for Health Statistics, vital statistics data, underlying cause of death, 1997–2001. Death rates are per 100,000 and are age-adjusted to the 2000 U.S. standard population.

³ Hyphens represent suppression of rates when there were 75,000 or fewer persons in the denominator or 20 or fewer deaths in the numerator.
